Carrer Objective

I am looking for an entry-level job to begin my career and gain hands-on experience. I want to use my skills to help the company and grow my abilities.

Education

Rajarambapu Institute of Technology, Rajaramnagar

B.Tech in Artificial Intelligence & Machine Learning   Sept 2023 – May 2027
- GPA: 7.3/10.0

Experience

Frontend Software Engineer, Elitceler Technologies, Hyderabad   Jan 2025
- Developed and maintained multiple admin panels for Liv Hospital, enabling real-time interactions between hospital staff and patients through features such as indoor navigation, live vitals monitoring, and ECG data visualization using WebSockets.
- Built the front-end for real-time health data display and integrated back-end APIs to support continuous patient monitoring.
- Delivered 5+ responsive websites for various clients, tailored to meet specific business and design requirements.

Software Engineer Intern, Vakt India, Remote   Jan 2023 – July 2024
- **Tech-stack:** ReactJS, TypeScript, Github, Docker, AWS, postman, Jenkins, Spring boot.
- Contributed to a project serving major clients, including Reliance Industries Limited and Aramco, utilizing cloud-based infrastructure to deliver scalable and efficient solutions.
- Automated back-end and front-end testing using Jenkins, triggering test pipelines on every Git push; reduced manual testing time by 60%, significantly accelerating development cycles.
- Successfully developed and integrated APIs with the front-end, streamlining processes and significantly reducing the time required for clients to complete manual tasks.

Projects

Creators WebSite| NextJs, Typescript, TailwindCSS, Shadcn ui, Framer-motion.   GitHub Live Demo
- Worked as a freelance developer to build a modern and responsive website tailored for creators and influencers, showcasing personal brands and digital portfolios.
- Utilized **Next.js**, **TypeScript**, and **TailwindCSS** to ensure high performance, scalability, and clean design.
- Enhanced user experience with smooth animations using **Framer Motion** and elegant UI components through **Shadcn UI**.

Prime Insurance Website| ReactJs, TypeScript, TailwindCSS, NodeJS, Rest APIs.   GitHub Live Demo
- Worked as a freelance developer to build a fully responsive and dynamic insurance website using **React.js**, **TypeScript**, and **Node.js**, completed within 4 weeks for a private client.
- Translated Figma designs into a production ready front-end with smooth animations and a modern UI, improving user engagement and reducing the bounce rate by an estimated 30%.
- Integrated REST APIs to handle submissions to contact forms, enabling automated delivery of inquiry data via email and streamlining client lead generation by 40%.

Achievements

- Successfully cleared the **TCS Prime**, demonstrating strong analytical skills, problem solving ability, and industry-relevant technical knowledge recognized by Tata Consultancy Services.
- Selected as a Finalist in the **Smart India Hackathon 2022**, representing my university among 100+ competing teams; recognized for innovative problem solving and full-stack development skills.

- Successfully completed internships at 6+ tech companies, gaining practical experience in software development, system architecture, and cross-functional collaboration.
- Completed a substantial number of coding challenges in **Leetcode**.
